

## Glassy-winged Sharpshooter

# Newsletter

## ABOUT THE NEWSLETTER

The purpose of the newsletter is to keep all those concerned with Glassy-winged sharpshooter (GWSS) and Pierce's Disease (PD) in the Temecula Valley up to date on GWSS activity in the area, based on monitoring being conducted by the University of California, Riverside. The monitoring program is supported by the California Department of Food & Agriculture and the Pierce's Disease Control Program. This newsletter provides updates twice a month over the most of the year of seasonal counts of GWSS from 160 traps in citrus groves and vineyards, counts relative to past years, and a list of the traps that caught GWSS. Only traps that caught GWSS will be listed, along with their unique trap identifier and total number of GWSS adults caught.

Copies of this and past newsletters, along with other information relevant to glassy-winged sharpshooter and Pierce's disease in Temecula Valley, can be found here: [temeculagwss.ucr.edu](http://temeculagwss.ucr.edu)

Updated maps of the trapping results can be found here: <http://apps4.cdfa.ca.gov/piercesmaps/>

## WEEKLY COMMENTS

GWSS numbers are slightly lower from the last survey with 83 GWSS, however, these are now spread across 46 traps. Numbers of GWSS are going down but they are being detected in low levels in more areas. Please see the map on page 4 for the trap locations.
